

# Growvite Sheep

Growvite Sheep is a high quality nutritional supplement that provides chelated minerals, vitamins and trace elements that are essential for improved fertility in sheep and for improved thrive in lambs and ewes.

Manufactured in Ireland to the highest specifications, Growvite Sheep has produced results in trials which are shown below:

- Lambs born alive increased by 22%
- 50% decrease in barrenness
- Ewes in better body condition

Get in touch with us if you would like to see the complete results of trials carried out by the Institute for Rural Studies at the University of Wales and we will be happy to supply you with the data.

## Administration of Growvite Sheep

As with all animal food supplements and medicines, Growvite Sheep should be administered with care. You can mix it with feed on an individual basis or give it in water.

Growvite Sheep comes in handy bottle packs of 1 litre and 2.5 litres so it is easy to store safely and measure accurately.

## When to Use Growvite Sheep

Give 10 ml Growvite Sheep to each ewe 2 weeks before tupping. Then give a further 10 ml per ewe from 4 weeks before lambing. You can also give it to lambs over 3 weeks old, at the rate of 1 ml per 5 kg of body weight at intervals of 6 weeks.

Tulivin also supply Growvite Sheep with copper, which contains added copper as 6.25 g of copper per litre.

## Find out More
