

Growvite Lamb

Help your lambs to grow strong and healthy with Growvite Lamb. This high quality, nutritional supplement supplies chelated minerals, vitamins and trace elements that are essential for thrive in growing animals.

Univet manufacture Growvite Lamb in a GMP compliant facility. Tulivin are the UK distributors, proud to be able to offer you a high quality product that offers benefits to you and your flock:

- Unique formula, based on molasses, for optimum absorption
- Ideal at weaning or times of stress
- You can use it in conjunction with a worming programme
- Give orally, add to water or feed

How and When to Administer Growvite Lamb

Growvite Lamb comes in handy bottle packs of 1 litre so it is easy to store safely and measure accurately. You must, of course, be careful to administer the right dose to your animals and the minimum interval between doses is three weeks. The correct dosage depends on body weight and age:

- Lambs: 2 ml per 5 kg
- Weaned Lambs: 7 ml
- Store Lambs: 15 ml
