

Growvite BEEF Data Sheet

Most soils in the UK and Ireland are deficient in essential nutrients such as Copper, Selenium, Zinc, Manganese and Copper. For profitable farming it is important to have animals perform to their optimum, whether it is in fertility terms or beef quality. Nutrient deficient forage can cause a nutrient imbalance in cattle resulting in ill thrift, poor hair, immunity problems and fertility issues.

Drenching with Growvite Beef supplies a top up of essential minerals, vitamins and trace elements important to redress these imbalances leaving their standard diet to supply the remainder.

GrowviteBeef can improve thrive, appearance and daily weight gain in growing beef cattle.

Administration of Growvite BEEF

As with all animal food supplements and medicines, Growvite BEEF should be administered with care. Growvite Beef can be administered orally, addefeed, mixed into the feed wagon or given in water.

Growvite BEEF comes in 2.5 litres pack so it is easy to store safely and measure accurately.

Indications for the Use of Growvite BEEF

Single Administration: 7.5ml per 50 Kg. Maximum amount 75ml per 500 Kg and over. Growvite Beef is a concentrated product, please administer slowly and with care.

Alternative Method of Administration. 500 Kg or over - 25 ml once per week for 3 weeks

For Ease of Administration In Feed. Dillute one part GrowVite BEEF with 2 parts water.

Contents Per Litre

Additives per Kg

E6 Zinc (as zinc sulphate)	10,450 mg
E2 Iodine (as potassium iodide)	10,300 mg
E5 Manganese (as manganese sulphate)	8,00 mg
E4 Copper (as copper sulphate)	6,250 mg
E1 Iron (as ferrous sulphate heptahydrate)	3,000 mg
E1 Iron (as ferrous sulphate heptahydrate)	2,000 mg
E1 Iron (as ferrous sulphate heptahydrate)	150 mg

Amino Acids

Methionine	3,500 mg
L-Lysine monohydrochloride	1.50 g

Analytical Constituents

Crude Protein	4.5%
Crude Fibre	<0.1%
Crude Ash	11.75%
Crude Oils and Fats	3.0%
Moisture	40.0%
Sodium	0.6%
Total sugar (as sucrose)	20.0%

Vitamins

Vitamin A (E672)	10 million IU
Vitamin D3 (E671)	1 million IU

Vitamin E	50,000 IU
Vitamin C	10,000 mg
Nicotinamide	2,000 mg
Thiamine Hydrochloride (Vitamin B1)	1,800 mg
D-Panthenol	1,000 mg
Riboflavin Sodium Phospahte (Vitamin B2)	1,000 mg
Pyridoxin Hydrochloride (Vitamin B6)	800,000 mcg
Folic Acid	800,000 mcg
Vitamin K (Menaphthone)	400,000 mcg
Vitamin B12 (Cyanocobalamin)	4,00 mcg
Biotin	2,500 mcg

Composition

(Sugar) Cane Molassess	
Di-Calcium Phosphate	

Intended Use

Growvit BEEF should be given as the first drink after calving.

Single Administration: 7.5ml per 50 Kg. Maximum amount 75ml per 500 Kg and over. Growvite Beef is a concentrated product, please administer slowly and with care.

Alternative Method of Administration. 500 Kg or over - 25 ml once per week for 3 weeks. Growvite BEEF can be given orally, added to feed, mixed into the feed wagon or given in water.

For Ease of Administration In Feed. Dilute one part Growvite BEEF with 2 parts water.

DO NOT EXCEED THE STATED QUANTITIES

Withholding Period:

None

Warnings:

Shake well before use

For animal use only

Store in a cool dry place and protect from light

Keep out of reach of children

FOR ANIMAL FEED ONLY

Manufactured for Tulivin Laboratories Ltd.
